

Shinde Harshada Hemant

Fullstack Software Developer

PROFILE SUMMARY

Experienced Full Stack Developer proficient in Angular, ASP.NET, SQL, and C#. Possess 2+ years of expertise in API integration, performance optimization, and UI responsiveness. Skilled in scripting for PDF, Excel, and text processing. Passionate about developing scalable, high-performance web applications. Excels in collaborative team environments and adept at problem-solving. Highly motivated and continuously seeking to enhance skills in emerging technologies.

WORK EXPERIENCE

Fullstack Software Developer

AvenData GmbH

09-2022 - Present

Developed and maintained Viewbox-World's dashboard, optimizing UI performance and user interaction.

- Integrated REST APIs to enable seamless communication between frontend and backend.
- Improved database query efficiency by 30%, optimizing MySQL queries for faster data retrieval.
- Enhanced application security and UI responsiveness, reducing page load time by 25%.
- Developed C# scripts for automated PDF, Excel, and text file processing, improving workflow efficiency
- Implemented Angular 19's latest features, including Standalone Components and Single Resource API, to optimize frontend architecture.
- Used RxJS for handling asynchronous operations and implemented NgRx for state management in key modules.

EDUCATION

CERTIFICATION

 Certified Angular Developer – Junior

■ PROJECTS

Viewbox-World – Data Archiving & Visualization Platform

28 Months

Developed a feature-rich dashboard using Angular to improve data visualization.

- Integrated REST APIs for smooth frontend-backend communication.
- Optimized MySQL queries, reducing response time and improving performance by 30%.
- Implemented advanced data visualization tools for better insights.

Automated Data Processing – PDF, Excel & Text File Parsing

28 Months

Designed and implemented C# scripts to extract, transform, and process data from PDF, Excel, and text files.

- Automated data parsing and validation, reducing manual effort and improving accuracy.
- Utilized Regular Expressions and File I/O operations to efficiently handle structured and unstructured data.
- Integrated with external systems to streamline data processing workflows in various business applications.

Property Booking System (Mini Project, Personal Development)

2 Months

- Developed a complete property booking solution with listings, authentication, and bookings.
- Designed an admin panel for efficient property and

transaction management.

Car Rental Booking Platform (Mini Project, Personal Development)

2 Months

Built a car rental system with user authentication and real-time availability tracking.

- Used Angular 19's ng-container, ng-template, and Single Resource API for dynamic UI updates.

★ SOFTWARE/TOOLS

frontend:

Angular | TypeScript | HTML | CSS | Bootstrap

backend:

ASP.NET Core | C# | REST APIs | .NET Core Framework

databases:

SQL Server | MySQL

Scripting & Tools:

C# (File Parsing - PDF, Excel, Text) |
Git/GitHub | Postman | Jira | Visual Studio
Code
